Profile

Motivated and results-driven Software Engineer specializing in backend development, full-stack web applications, and machine learning integration. Experienced in building scalable APIs, deploying cloud-based solutions, and developing data-driven applications. Passionate about solving real-world problems through AI and modern software systems. Strong problem-solving skills with a continuous learning mindset.

Skills

- **Programming Languages** : Python, JavaScript
- **Frameworks & Libraries** : Django, Flask, FastAPI, Node.js, Express.js, React.js
- **Databases**: PostgreSQL, MySQL, MongoDB, Supabase, Firebase
- **Technologies & Tools** : RESTful API Development, Machine Learning, Cloud Deployment, Docker
- **Other Skills** : Software Testing & Debugging, System Design, Documentation, Version Control (Git)

Professional Experience

02/2024 – 11/2025
Kigali, Rwanda

Backend Developer
Smplfid

- Develop and maintain scalable backend systems using Nodejs and Django, etc.
- Design and implement secure, high-performance RESTful APIs.
- Work with relational and Non relational databases
- Build and integrate machine learning components for data-driven applications.
- Deploy and manage applications across cloud platforms including Hetzner, DigitalOcean, Render, Railway, etc.
- Optimize system performance, integrate third-party services, and ensure application reliability and scalability.

08/2022 – 12/2023
Kigali, Rwanda

Quality Assurance
Consultified Rwanda

- Conducted thorough end-to-end testing across multiple websites.
- Identified anomalies, incorrect data displays, and issues with consistency.
- Documented detailed reports, strengthening analytical review and precision-driven workflows.

Education

01/2023 – 11/2025
Kigali, Rwanda

Bachelor's Degree in Software Engineering
African Leadership University 

- **Expected Graduation**: July 2026
- **CGPA**: 4.34 / 5
- **Relevant Courses**: Machine Learning, Artificial Intelligence, Data Structures, Software Engineering, Database Systems, Full-stack development, Cloud Computing

01/2018 – 07/2021
Kigali, Rwanda

Secondary School Diploma
IFAK Don Bosco

Subjects: Mathematics, Economics, Computer Science

Projects

Research Assistant

Analyzes businesses and automatically suggests potential partners and Give you Market insights using NLP.

AI-Powered Plant Disease Detection

Detects plant diseases through leaf images using computer vision and ML models, providing actionable insights for farmers.

Fraud Detection System

Implements ML algorithms to detect fraudulent transactions in financial datasets, improving security and reducing losses.

ML Recruitment Platform

Predicts candidate-job fit using NLP and predictive analytics, automating recruitment processes for SMEs.

Energy Consumption IoT System

Tracks electricity usage in households and predicts future consumption costs using ML models.

HealthSync

Digitizes patient records and automates insurance claims using ML, enabling doctors to access patient history securely.

FarmLink Project

Connects farmers with marketplaces and provides predictive insights on crop yield and demand using ML..

SmartBin IoT

Developed an IoT-enabled smart waste management system that monitors bin levels and optimizes collection routes.

Languages

- Kinyarwanda
- English
- French
