Profile

Passionate Software Engineer with experience in backend development, full-stack web applications, and software testing. Skilled in building scalable, secure APIs and integrating third-party services. Currently specializing in machine learning as part of my Software Engineering studies, with a focus on integrating ML models into real-world applications. Experienced in cloud deployments, data visualization, and collaborating on cross-functional projects to deliver innovative solutions.

Professional Experience

2024/02 – present Kigali, Rwanda	Backend Developer <i>Green Arts</i> • Develop and maintain secure, scalable web applications and APIs using Python and Django. • Collaborate with frontend teams to ensure seamless integration of backend services. • Work with PostgreSQL and MySQL databases using Django ORM to handle complex queries and data management. • Integrate third-party services to enhance functionality and improve user experience. • Deploy applications on Microsoft Azure, optimizing for performance and scalability.
2022/08 – 2023/12 Kigali, Rwanda	Website Tester <i>Consultified Rwanda</i> • Conducted end-to-end testing to identify and report issues across multiple websites. • Collaborated with developers to implement improvements and maintain documentation. • Executed test cases ensuring cross-platform compatibility and optimal performance.

Education

2023/01 – present Kigali, Rwanda	Bachelor's Degree in Software Engineering <i>African Leadership University</i>  • Specializing in Machine Learning, with a focus on integrating ML models into applications. • Gained experience in full-stack web development through hands-on projects.
2018/01 – 2021/08 Kigali, Rwanda	Secondary School Diploma in Mathematics, Economics, and Computer Science <i>IFAK Don Bosco</i> Completed secondary education with a focus on Mathematics, Economics, and Computer Science. This foundation provided me with strong analytical skills and a passion for technology, which greatly influenced my decision to pursue a degree in Software Engineering.

Skills

Python, Django, Node.js, Express	Typebot, WhatsApp Business API, RESTful APIs
MySQL, MongoDB, PostgreSQL	HTML, CSS, Tailwind CSS, JavaScript, React.js
Software Dev. Methodologies	Testing and Debugging
Time Management	Continuous Learning
Machine Learning Integration (in progress)	Documentation

Certificates

- AWS Cloud Practitioner Essentials [↗](#)
- Developing Back-End Apps with Node.js and Express [↗](#)
- Python for Data Science, AI & Development [↗](#)
- Developing Front-End Apps with React [↗](#)

Projects

2024/02 – 2024/07	HealthSync Rwanda ↗ HealthSync Rwanda is a cutting-edge solution designed to modernize record management in Rwanda’s healthcare system. By combining thorough research, innovative technology, and collaboration with healthcare professionals, we created a user-friendly system that enhances patient care, streamlines data storage, and automates insurance claims processing. My approach ensures security, compliance, and continuous improvement, meeting the evolving needs of healthcare providers and improving patient care throughout the country.
2023/08 – 2024/01	SmartBin ↗ Smart Bin aims to revolutionize waste collection and recycling processes. Utilizing IoT sensors, the system provides real-time data on waste levels, optimizing collection routes and schedules. This approach not only reduces operational costs but also improves waste management efficiency and promotes environmental sustainability by ensuring timely recycling and waste reduction.
